

Erlanger Hospital Occupational Therapy Services Level II Fieldwork Weekly Objectives

Week 1 Objectives:

Day 1: Meet with SCCE for short orientation, initial EPIC setup/overview. Meet with your FWE and discuss work hours, weekend rotation, vacation/short days, and exchange contact information.

- Tour and familiarize yourself with the facility.
- Set up and familiarize yourself with e-chart (reference handouts).
- Observe your FWE completing patient care/chart review/documentation 100% of the time.
- Begin to discuss various patient populations, identify patient's strengths/barriers to progress, treatment plan/interventions, safety/precautions, protocols, LDAs, and discharge recommendations.
- Student will be able to assist with prioritizing daily schedule of patients.
- Discuss desire for any personal objectives you would like to achieve by the end of week 1.
- Review of weekly objectives and goals.

Week 2 Objectives:

- Continue observation of your FWE performing patient care while physically assisting up to 25% of the time.
- Begin to perform chart review along with FWE and contribute by gathering patient medical history.
- Begin to assist FWE with gathering patient's occupational profile.
- Begin to provide minimal physical assistance along with FWE for portions of patient evaluation/treatment.
- Begin to discuss patient performance deficits, effect on self-care and functional mobility, and discharge recommendations.
- Student will be able to prioritize daily schedule of patients.
- Accurately assess UE ROM and MMT 75% of the time.
- Review of weekly objectives, goals, and student project/journal club and discuss areas of improvement.

Week 3 Objectives:

- Continue observation of your FWE performing patient care while physically assisting 25-50% of the time.
- Continue to work on gathering pertinent patient information during chart review.
- Consistently gather social history from patient/family.
- By the end of the week, complete documentation on 2 floor patients with assistance as needed.
- Accurately assess and document UE ROM and MMT 100% of the time.
- Identify patient deficits and collaborate with FWE to select appropriate interventions, POC, equipment needs, and discharge planning.
- Begin to initiate collaboration with care team regarding co-treatments and appropriateness for OT services.
- Review of weekly objectives, goals, and student project/journal club and discuss areas of improvement.
- Check in with SCCE .

Week 4 Objectives:

- Continue observation of your FWE performing patient care while physically assisting 50-75% of the time.
- Demonstrate the ability to perform thorough chart reviews for floor patients and articulate history and precautions/restrictions to your FWE/care team members.
- Complete evaluation and documentation on 2-3 floor patients with supervision and assistance as needed.
- Identify deficits and select appropriate interventions and POC with minimal FWE assistance.
- Begin to observe FWE performing ICU/medically complex patient care.
- Discuss and identify specific student projects, journal club topic/date, and opportunity for observation of surgeries/clinics/procedures.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 5 Objectives:

- Complete 3 floor evaluations and document with minimal corrections required from FWE.
- Continue to observe FWE performing ICU/medically complex patient care.
- Assist with chart review and collaborate with FWE to document evaluation/treatment of medically complex patients.
- Provide 50% physical assistance with ICU/medically complex.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 6 Objectives:

- Complete 3-4 floor evaluations/treatments and document with limited corrections required from FWE.
- Complete ICU/medically complex chart review with minimal FWE assistance.
- Continue to collaborate with FWE to document ICU/medically complex patient evaluations/treatments.
- Provide 75% physical assistance with ICU/medically complex evaluation/treatment.
- Review of weekly objectives/goals and discuss areas of improvement.
- Complete mid-term assessment and review.

Week 7 Objectives:

- Complete at least 3-4 floor evaluations/treatments with supervision.
- Document 1-2 ICU/medically complex patient evaluations/treatments with FWE assistance.
- Provide 75% physical assistance with ICU/medically complex evaluation/treatment.
- Update FWE on progress with student project.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 8 Objectives:

- Manage/prioritize individual caseload independently.
- Student will complete floor patient evaluations/treatments/documentation with supervision.
- Document 1-2 ICU/medically complex patient evaluations/treatments with minimal FWE assistance.
- Finalize plans for observing surgeries/clinics/procedures if not already completed.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 9 Objectives:

- Complete 1-2 medically complex patient evaluations/treatments/documentation with minimal assistance from FWE.
- Check in with SCCE.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 10 Objectives:

- Complete 2-3 medically complex patient evaluations/treatments/documentation with limited assistance from FWE.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 11 Objectives:

- Complete 3 medically complex patient evaluations/treatments/documentation with supervision from FWE.
- Review of weekly objectives/goals and discuss areas of improvement.

Week 12 Objectives:

- Complete 3-4 medically complex patient evaluations/treatments/documentation with supervision from FWE.
- Complete the Student Evaluation of Fieldwork Form and review it with your FWE. Your FWE will review your performance using the AOTA Fieldwork Performance Evaluation.
- Complete your final student project.
- Complete exit interview with SCCE
