

Erlanger Virtual Desktop Setup & Access Guide For MAC

- If you currently access the Erlanger Virtual Desktop (VDI) through the client/icon on your desktop, please try accessing VDI using your existing client. Start at step #12.
- If you have accessed the Virtual Desktop Environment a different way or your client doesn't work, please follow the instructions below to download the most recent client.
- After the VMware Horizon View client is installed, you can access the virtual desktop both inside and outside the Erlanger network.

MAC Security Settings for Install

- In order to install software outside of the App Store, you will have to:
 - Change your security settings for installing applications.
 - In System Preferences, select **Security & Privacy**.
 - Under the **General Tab** allow apps downloaded from: **Anywhere**.
 - You can change back to your previous choice after the install.

How to Install Client Required for Erlanger Virtual Desktop Access

1. Download and install Microsoft Remote Desktop Connection for Mac from: <http://www.microsoft.com/en-us/download/details.aspx?id=18140>
2. Open your Internet Browser. Type “desktop.erlanger.org” as shown below.

3. You will be directed to the VMware Horizon Client install. Click on the “**Install VMware Horizon Client**” button shown below.

4. Click “**Go to Downloads**” for VMware Horizon Client.
 - ❖ **MAC Users** - If you have a MAC workstation, click “**Go to Downloads**” for VMware Horizon Client for MAC. Select the dropdown box and choose version 3.5.2.

5. Make sure you select the correct version as noted in step 3. Then, click **DOWNLOAD**.

6. Once the install is downloaded, open the install by double clicking it. It will look like the images below depending on your Internet Browser.

7. Click **Run** or **Yes**.

8. Click **OK**
